Satellite

Les Enluminures has inaugurated a series of books which we are calling our "Satellite Series." Like orbiting satellites that explore and subsequently transmit information back to earth, these books will give us the opportunity to explore themes related to Les Enluminures's core inventory in new ways and to write about peripheral items that are not part of our core inventory at all. Stepping outside the usual boundaries of academic disciplines, we want to feel free to look at the big picture and to explore connections across media, however unlikely they may seem at first. We want to communicate ideas to audiences of all sorts in a way that deep engagement with the material makes possible.

2019, Les Enluminures
ISBN 978-2-9567024-0-5

The Satellite Series enables us to explore topics at the edges of our core inventory, looking at the big picture and connections across media. It is fitting that the first "satellite" is focused on neo-Gothic books woven with silk. Matthew J. Westerby excellent essay presents new findings on five books programmed with punch cards and produced with Jacquard looms in Lyon for submission to the 1889 World's Fair.
